2435 S. 47 St., Phoenix

**Cost:** Members: \$30  
Non-Members: \$35  
Students: \$10

### Presented by:

Bob Swan, Euclid Chemical

EUCLID CHEMICAL

We all understand the concept of Murphy's Law. If you think you've heard some outrageous stories about jobs that went into the twilight zone then you need to hear from Bob Swan of Euclid at this month's meeting. Bob is the one who shows up after the job gets twisted and helps get things back in order. Learn some of the Do's and Don'ts from a man who has witnessed the aftermath of job site accidents, acts of God and just plain old bad judgment in the world of concrete repair. Bob will share a few experiences when repair jobs threw him a curve ball.

Bob has been with Euclid Chemical for over 25 years and has over 30 years of concrete industry repair and restoration experience. His past responsibilities have included market and product management, product development and formulation, as well as sales force support and customer training.

Bob is a long time member of the American Concrete Institute and the International Concrete Repair Institute. He has an extensive background in the formulation and application of concrete related materials used in extreme high wear environments. Bob earned a Bachelor of Science degree in Chemistry from Eastern Michigan University and an MBA, with a focus on marketing, from Baldwin Wallace University in Ohio.
